### Bringing Height to the Playground with the Alpha™ Tower & Alpha Link™ Towers

Modern designs deliver a physical and social wonderland where imaginations soar  
Delano, Minn. (Feb. 13, 2018) — Landscape Structures Inc., a Delano, Minn.-based commercial  
playground equipment manufacturer, is bringing height to the masses with the launch of the Alpha Tower  
and Alpha Link Towers. Multiple climbing and sliding opportunities deliver physical challenge and fun  
for kids ages 5 to 12, and unique lookout spots encourage socialization.

The Alpha Tower and its innovative climbers invite kids to scale the outside up to the 4- and 8-  
foot decks. Or kids can climb inside to reach the first decks plus continue on to see the amazing view  
from the fully enclosed 12-foot deck. A compact interior will have kids climbing and crawling to explore  
all the different activities. Even more, the Double Swoosh Slide® and the curvy WhooshWinder® Slide  
offer a thrilling ride from the 8- and 12-foot decks, respectively.

Playground planners can double the climbing challenge with the Alpha Link Towers. Two towers  
are linked by an elevated crawl tunnel for a sky-high scramble from one tower to the other. Multiple  
climbers offer different routes up the outsides of both towers to the 8-foot decks, while kids reach the 12-  
foot summit from the fully enclosed tower. And with slides, bridges and more playground activities, kids  
will stay engaged for hours on end.

The distinctive geometric design of the Alpha Tower and Alpha Link Towers encourages  
imaginative play among 5- to 12-year-olds. Kids find plenty of unique ways to look out at the activity  
happening on the ground, or find shaded hangouts to relax with friends. Parents and supervisors will  
appreciate the perforated panels that offer clear sightlines.

— more —

The Alpha Tower and Alpha Link Towers deliver a cool aesthetic with the Hot Dip Galvanized (HDG) steel frame, which is a perfect match for the modern design. HDG creates the contemporary patina, and involves completely dipping the product into a bath of molten zinc. The zinc reacts with the steel to form a series of intermetallic layers making it highly resistant to corrosion.

### **About Landscape Structures Inc.**

Since 1971, Landscape Structures Inc. has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
