Create a Sensory Experience with New Rhapsody® Outdoor Musical Instruments
Expansion of collection delivers more musical opportunities for individuals of all ages, abilities
Delano, Minn. (Feb. 26, 2019) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, has expanded its collection of Rhapsody® Outdoor Musical Instruments with three instruments—chimes, bells and drums. This superior outdoor musical collection welcomes newbies as well as polished musicians to explore the power of rhythm.

Originally introduced in January 2016, this playful and elegant collection lends itself to any environment—playgrounds, community centers, schools, childcare centers, preschools, senior centers and more. Learn about the new instruments now available from Landscape Structures:

- **Vibra™ Chimes** Eight large chimes, each with their own mallet, play eight of the lowest notes and allow users to feel the vibration generated along with hearing the sound. Choose all eight chimes to create a diatonic scale, five for a pentatonic scale, four to create a major chord or place individual, multi-sized chimes throughout your play space.
- **Cascata™ Bell** Vertical bells create 10 different tones on this outdoor musical instrument. Use the attached mallet to ring out notes one at a time or glide the mallet over all the bells for a fun music-making experience. The Cascata Bells are the perfect instrument for musicians of all ages and abilities.
- **Tongue Drum** The Tongue Drum joins the Rhapsody family of drums to create a fantastic drum line. With its six distinct notes, users of all ages and abilities can strike the different “tongues” of the drum to create various sounds and tunes.

Landscape Structures consulted with a musical advisor on the development of the original line of Rhapsody Outdoor Musical Instruments to ensure every instrument in this patent-pending collection achieves precision manufacturing and consistency in tones. That's how the new chimes, bells and drums deliver the same great sound. Even more, all of the Rhapsody instruments are manufactured to endure years of music making in the elements.
